

COREPRO™

Whole House Conditioning and Filtration

Protecting your home and family, is at the Core of what we do!

Quality Construction Means Quality Water

The **COREPRO™** Whole House Conditioning and Filtration System removes sediment, chlorine, chloramines, heavy metals like lead, nickel, and mercury, VOC's, pesticides, herbicides, xylene, and benzene. In addition to removing contaminants that effect the taste/odor and pose health risks; the **COREPRO™** also controls scale. This can help save you valuable time you spend cleaning and money on detergents, clothing and replacing expensive water using appliances.

• **COREPRO™** has options for larger homes

1000 Series - 1 - 2 Bathrooms

1500 Series - 1 - 3.5 Bathrooms

2000 Series - 1 - 4 Bathrooms

- Optional stainless steel jacket for superior strength and aesthetics
- Carbon filter - Removes chlorine and organics, resulting in better smelling and tasting water
- Bacteriostat KDF - removes heavy metals and prohibits bacterial growth
- Aluminosilicate - Filters sediments down to 3 microns

COREPRO™

Whole House Conditioning and Filtration

The COREPRO™ Whole House Conditioner and Filtration System is built with some of the highest quality media in the industry. The six layers of filtration will provide high quality drinking water for years to come.

1. Carbon Filter - Removes chloramine, chlorine and organics, resulting in better smelling and tasting water
2. Bacteriostat KDF - Removes heavy metals and prohibits bacterial growth
3. Aluminosilicate - Filters sediment down to 3 microns
4. Sequestering Beads - Conditions water to reduce scale deposits in plumbing, appliances and fixtures
5. Gravel Bed - Prevents fine particles from passing through. Also helps to distribute backwash water
6. Ferrite Magnets - Reduces surface charge on small calcium and magnesium molecules, resulting in larger particles that are less likely to deposit as scale

Benefits provided by the COREPRO™ Water Treatment System:

- Removal of chlorine for healthier better tasting water
- Removal of sediment
- Removal of heavy metals
- Removal of organics for better smelling and tasting
- Reduces buildup of lime scale by coating scale forming minerals
- Extends the life of water using appliances, fixtures and plumbing
- No waste water and no drain required (In/Out Models only)
- Requires little to no maintenance
- No salt/chemicals required
- Environmentally healthy
- Increases water heater efficiency
- Reduces time cleaning fixtures, tile, tubs and toilets
